The environment is an important concern which has emerged both nationally and internationally, and has continued to gain in importance as the impact of the environmental degradation is being strongly felt everywhere. On a national level due to the importance of the construction industry, the limitidness of land, and the economic development experienced in Malta over the past few years, the impact of the construction boom has been significant.

This year's conference on 'Ethics in Business' will discuss the main motivating factors that should underline development, focusing on the environment, and providing a forum for discussion on the question of development both at a local, national, and international level.
