Press Release: The Gozo Business Chamber (GBC) notes with satisfaction the introduction of the reduced fare travel scheme by the Ministry for Gozo

The Gozo Business Chamber notes with satisfaction the initiative announced by the Ministry for Gozo regarding the reduced Gozo Channel fare travel scheme between Monday and Thursday for the month of July. This scheme was proposed in the technical committee set up by the Ministry for Gozo with the Gozitan employer groups, to discuss economic measures to incentivise the Gozitan economy.

Such a measure will help to attract domestic tourism during weekdays, thus generating the required economic activity which is essential at this point in time. Tourism impacts the Gozitan economy in many ways, not only in the accommodation and catering sectors, but also in other important economic segments such as the retail industry.

As indicated by the latest statistics on regional tourism issued by the National Statistics Office (NSO, *News Release 110/220*), domestic tourism contributes significantly to the Gozitan economy. In 2019 domestic tourists accounted for 54.3% of the total tourism demand in Gozo. In 2019 the number of Maltese residents who stayed in Gozo and Comino totalled 215,272. This translated itself in 571,500 nights and generated an estimated total expenditure of € 35.9 million. Though these figures represented a decrease from the 2017 and the 2018 figures, the GBC believes that this measure will help to incentivise the Gozitan economy, making Gozo an attractive destination for this holiday period.
