Date: Wednesday, 4th March 2026

Time: 09:30 – 14:00

Location: Hotel Ta' Cenc & Spa, Sannat, Gozo

The Gozo Business Chamber, in collaboration with The Malta Chamber, is organising an information session specifically designed for Gozitan entrepreneurs, managers, and employers who wish to better understand how sustainability can strengthen their business performance.

Sustainability today is not simply a compliance requirement, it is increasingly becoming a strategic lever for competitiveness, operational efficiency, and long-term resilience. This interactive session will focus on practical, business-oriented solutions that enterprises in Gozo can realistically implement.

During the session, participants will:

- Explore cost-effective sustainable practices that can improve operational efficiency
- Gain insight into opportunities emerging from the circular economy and the green transition
- Learn about funding schemes and support measures available to assist businesses in making sustainable investments
- Engage in discussion on how sustainability can be integrated into business strategy

The session is tailored to the specific realities of operating in Gozo and aims to provide actionable guidance rather than theoretical concepts.

Businesses seeking to strengthen their competitiveness, reduce costs, and align with evolving market and regulatory expectations are encouraged to attend.
